

## SASYAPOSHAK

**SasyaPoshak** is a matured compost blend of organic manure with **vermicompost, botanical cakes, bio fertilizers and rock phosphate**. The high load microbes help in solubilizing different nutrients in the growing media. The high micronutrient content makes it suitable across soil types, crops and seasons. Regular use of SasyaPhoshak improves soil health, enriches nutrients and produces better yields. It is a useful soil input for potted vegetables, ornamentals and many other field, plantation and fruit crops.

**Offered in package of 5 & 25 kg hand baggage.**

### USPs

- Scientifically blend compost
- Improves soil structure and texture, enhances root aeration and growth
- Contains beneficial micro flora to boost soil health
