

SASYAPOSHAK^{PLUS}

SasyaPoshak^{Plus} is SasyaPoshak fortified with Hydropod super absorbents. Hydropod super absorbents are hydrophilic polymers with ability to absorb significant amount of water (more than 300 times of their own mass) and retain moisture at the root zone. While the high load microbes and micronutrients makes SasyaPoshak^{Plus} suitable for all type of soil, crops and seasons. Its exclusive moisture retaining property makes it very appropriate for dry land agriculture. It is a useful soil input for potted vegetables and ornamentals, helping to retain water at root zone, by reducing the frequency of watering, subsequently saving water substantially.

Offered in package of 5 & 25 kg hand baggage.

USPs

- Scientifically composted organic manure fortified Hydropod super absorbents
- Improves soil structure and texture, improving root aeration and growth
- Retains moisture at root zone and releases up to 90% during dry spells
- Reduces irrigation frequency and thereby saving on labor, electricity etc.
- Contains soil beneficial micro flora and many micronutrients
- Optimal C/N ratio and NPK value

Usage:	
For potted plants	150-200g/pot
Vegetable crops	1 MT/acre
Plantation/ Fruit crops	2-3 kg/per tree
Lawn	1 MT/acre
Cash crops	2 MT/acre
