

SASYARAKSHAK

SasyaRakshak is a water soluble plant protectant, carefully designed to contain all good constituents derived from botanicals such as Lakki soppu (*Vitex negundo*), Ekka (*Calotropis gigantea*), neem (*Azadirachta indica*), lantana (*Lantana camara*), sweetflag (*Acorus calamus*), Adusoge (*Adathoda vasica*) and Nityapushpa (*Vinca rosea*). The combination of active ingredients from these plant sources provide excellent protection to the crop plants against the sucking (Aphids, thrips, mites, mealybugs, hoppers and bugs) as well as biting (leafminers, caterpillars, beetles, weevils) insects. SasyaRakshak has fair effect against mildews, leaf spots and many other fungal pathogens affecting different plants.

Offered in package of 100ml, 500ml, 1 ltr & customizable sizes.

USPs

- It is a completely water soluble liquid formulation derived from bioactive botanical principles
- Wide spectrum effect and action against plant pests, both sucking and chewing types, due to combination of active ingredients
- Effective against fungal plant diseases
- Natural origin and organic, safe for use on food, flower and fruit crops
- Useful in integrated pest management even in conventional agriculture

Usage:

Aerial spray to completely cover the crop plants against different pests @10ml/l
